## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, filed 12/16/2004, with respect to claims 24,25,45 and 46 have been fully considered and are persuasive. The rejection of 09/14/2004 has been withdrawn.
2. Applicant has canceled claims 1-23.

### **EXAMINER'S AMENDMENT**

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
4. Examiner has canceled the withdrawn claims 40-44.

### ***Allowable Subject Matter***

5. The following is an examiner's statement of reasons for allowance:  
Regarding claims 24,38,45 and 46,the prior art of the record in particular Butler US patent 3,873,862 does not teach or suggest a supporting structure for an electric fan motor comprising: a first motor housing having at least one inlet opening disposed on a surface of the first motor housing, a second motor housing having at least one outlet opening disposed on a surface of the second motor housing including inter alia, a plurality of passages formed there through, windings passing within at least a portion of said plurality of passages, a first portion of the windings disposed on a first side of the stack and substantially within the first motor housing, and, a second portion of the

Art Unit: 2834

windings disposed on a second side of the stack and substantially within the second motor housing, wherein the at least one inlet opening is in fluid communication with the at least one outlet opening and air flows into the at least one inlet opening, over the first portion of windings, substantially all of an exterior portion of the plurality of laminations, and the second portion of windings, and iii) out the at least one outlet opening.

Regarding claim 37, the prior art of the record in particular Butler US patent 3,873,862 does not teach or suggest a supporting structure for an electric fan motor comprising : a first motor housing having at least one inlet opening disposed on a surface of the first motor housing, a second motor housing having at least one outlet opening disposed on a surface of the second motor housing including inter alia, at least one opening disposed on a surface of the second motor housing, and a mating surface, and a stator comprising ; a plurality of laminations coupled to a portion of the mating surface of the first motor housing and a second surface coupled to the mating surface of the second motor housing, a first portion of windings disposed within only the first interior space, and a second portion of windings disposed within only the second interior space, wherein the air flows into the at least one opening in the first motor housing, ii) over the first portion of windings, substantially all of an exterior portion of the plurality of stator laminations, and the second portion of windings, and out the at least one opening in the second motor housing.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
